

Letter of Reference RE: Advanced Industrial Group

To Whom It May Concern,

I have had the opportunity to work with Advanced Industrial Group for various types of work starting in 2012. They have provided various services for me and my coworkers as a member of the Signals and Communications team at CN Railway including, but not limited to:

Maintenance and Emergency Repair services for generator and solar systems

Backhoe, Boom Truck, and Cable Plow services

Snow Removal services

Small Engine repair

Leased Vehicle maintenance and repairs

Whether it was for work planned well in advance or for middle of the night emergencies Jamie, Nikki, and the staff at Advanced Industrial Group have always been available and able to provide timely and quality assistance. Regardless of time of year or how poor the weather is they have always answered the phone and been willing to provide whatever services were requested. They have been more than willing to assist for various issues that have arisen that do not directly relate to the above list and have been a reliable and invaluable asset in addressing any number of ad hoc situations by providing creative solutions.

I would certainly recommend Advanced Industrial Group as a contact for any of the above services and beyond.

Daniel Blakeney
